

## PROJECT COMPLETION REPORT

2018-2019 School Year

### Identification of the child:

First and family name: Judy Bloom

Date of birth: 25 March 2006

Permanent code (if known): unknown

**Evaluation Method**: Evaluation by the holder of a teaching license.

### Description of child progression:

Judy has continued to improve her skills and knowledge in drawing and in creative writing. She created characters and wrote several stories based on those characters. She also greatly improved her written communication, (wording, punctuation, and grammar) by participating in several online forums and cooperating in projects, as well as her verbal communication, (find valid arguments and defend them, listen to others' ideas and take them into account), by participating in discussions on several subjects of interest to her.

By buying and selling characters on deviantart.com, Judy made progress in mathematics. By playing video games such as Sea of Thieves and Ark: Survival Evolved, she deepened her understanding of historical, mathematical, and scientific, (which led to more advanced discussion and research on the subject - for example: DNA and evolution, history of navigation, etc.), polished her map reading skills, and explored ethical concepts, amongst others. I also noted Judy's progress during our discussions on a wide range of subjects, such as grammar, mathematics, science, geography, economics, ethics, and much more. We have watched many videos and documentaries that contributed to deepen her knowledge. During outings, trips, and visits, Judy continued to improve her conception of the world and of herself.
